

ICORS: Hip clinical bridge sessions

7:00 – 10:00	Registration	Staff
9:00 – 12:00	Clinical Bridge Session: Young adult hip	Organised in Conjunction with British Hip Society and British Orthopaedic Research Society Organisers: Tim Board, Sophie Williams
9:00-9:05	Welcome	Chairs: Dominic Meek and Sophie Williams
9:05 – 9:30	Developmental mechanisms of FAI	Sion Glyn-Jones
9:30 – 9:55	Modelling and experimental methods to investigate mechanical damage in the hip	Alison Jones
9:55 – 10:20	Labral reconstruction science and results	Tony Andrade
10:20-10:40	Break	
10:40 – 11:00	Improving outcomes of FAI surgery with digital planning and robotic surgery	Vikas Khanduja
11:00 – 11:25	Use of biologics in hip preservation surgery	Jan Sommers
11:25 – 12:00	Moderated Discussion: Consensus on research gaps	Chair Dominic Meek (BHS) and Sophie Williams (BORS)
12:00 – 13:30	LUNCH & POSTERS & EXHIBIT HALL	
13:30 – 15:15	Clinical Bridge Session: Spinopelvic alignment and instability in THR	Organised in Conjunction with British Hip Society and British Orthopaedic Research Society Eduardo Garci-Rey, Tim Board, Sophie Williams
13:30 - 13:45	How is this screened for in clinic?	Jim Pierrepont
13:45 – 14:00	What is spinopelvic alignment and how to understand it	Andrew Shimmin via Zoom
14:00 – 14:15	Spinopelvic alignment - view from a spine surgeon	Gianluca Vadala
14:15 – 14:30	What can we do with this information? Perspective of an engineer	James Anderson
14:30 – 14:45	What can we do with this information? Perspective of a clinician	Sion Glyn-Jones
14:45 – 15:15	Questions and moderated Discussion: Is a “positioning system” that considers spinopelvic alignment needed for all patients undergoing THRs	Chair Dominic Meek (BHS) and Sophie Williams (BORS)
15:15	Close
